## LONG 1st PERSON BIO

It feels strange to write who I am in one paragraph, as I have played many roles over the years and I feel like I am a constantly evolving who I am in this lifetime. As I awaken to my Self, I am uncovering new paths as I listen to my intuition and continue to learn and grow. To share in simple words, I am a truth seeker, healer, empath, Ascension advocate and a protector of Mother Earth. I am also a mother, a wife, a designer, a photographer, and a filmmaker. I am a holder of Divine Light.

My first awakening journey began in the winter of 2001, when I felt called to travel to India, Nepal, and Egypt. My adventure began at the world's largest spiritual festival, the Maha Kumbh Mela, where I spent time with gurus, yogis, and sadhus. As a yogini myself and a photographer, I traversed the landscape of these places with an open heart. Later joined by my now husband Mark, we left Egypt feeling activated to use our skills for the greater good. Upon returning to the States, Conscious Creative was born. We focused on helping green businesses, non-profits and other socially conscious organizations by providing graphic design, web design, photography and video production. We used tree-free papers, soy-based inks and digital video and photography before it was the norm. In 2002, we were the first green-certified creative agency in San Francisco.

2012 marked the start of my second awakening. That year, I felt a new path starting to light up and felt called to do more to help people awaken to a new vision for our planet, to make a greater impact on humanity by helping people discover their new paths. For the past 5 years, under my spiritual teachers I've studied meditation, energy fields, innate wisdom, essential oils, and energy healing modalities such as Reiki, The Emotion Code and Quantum Psionics.

In 2017, I kicked off The Ascension Sessions, a series of video interviews with spiritual leaders sharing their wisdom on the topic of Ascension. My focus is to help people open their hearts and minds; to hold new visions of where we are headed as a people on a peaceful, loving planet full of heart-centered people

who are of one collective consciousness; one where we hold love and peace as a priority for the greater good of humanity, the animal kingdom, and all who call Mother Earth (Gaia) home. I am doing this work through use of media and hands-on energy healing practices with Quantum Psionics and essential oils. I am here to protect the Earth, to hold the Divine Light, and to help people awaken to their inner truths.
